

THE SEA OF PLASTIC

Name: Marlies und Nora

Date: 18.06.2021

Hello guys!

In the past there was no plastic in the sea and more fish. Please refrain from throwing your garbage into the sea, or do you want fish to eat it and maybe end up on your plate. Do you want sea turtles to mistake plastic bags for jellyfish and choke on them? Do you want whales to eat too much plastic and have no room in their stomachs for real food? If not, then stop throwing your plastic into the sea. If all people continue to do so, then many animals will die out and no one will want to swim in the sea because everything is so dirty.
